The Company: Peninsula own five Care and Nursing Homes in South Devon; they are, first and foremost, committed to the individual well being, comfort and happiness of each of their residents. They aim to do this in a homely environment that encourages residents to live full and contented lives. They strive to maintain an atmosphere that enables every resident's individuality and self-esteem to be respected, along with their dignity and independence.

The high quality of life they are seeking on behalf of their residents can be attributed to the physical surrounds, the level of care and the social engagement and activities of the home. Every Peninsula Home is different, whether in the countryside, in the town or by the sea, and each has developed its own unique character that is so valued by its residents. This can be a beautiful garden, stunning views, individualised dining areas, proximity to shops, newspaper readings, bingo and quiz nights, arts and crafts, or the pleasure of the house pet or tropical fish tank.

Solution: A **Mil-tek** 102 Baler has been installed to handle the recyclable waste produced by the Home. All the cardboard and plastic waste is now baled and is sent for recycling.

Quote: David Arnold, Managing Director of Peninsula Homes, believed that he could not only reduce his ever increasing landfill costs, but also provide much better recycling facilities for the guests.

'We have a greater responsibility to recycle than many other business sectors. Our customers are reassured that we are able to recycle all cardboard and plastic packaging, tins, cans, bottles and newspapers at all our Sites. Mil-tek have provided a baler and have been able to get free collections of all baled materials.'

Summary: Neil Holland from Mil-tek added 'We offered a free two-week trial at Parkland House – a Care Home with 49 residents. The teamwork shown to fulfill their recycling objectives was magnificent; collections of general waste has been reduced from 3 to 2 per week'
