

'Solutions'

The Client: Sun Valley is 20 acres of beautifully tended grounds in a quiet picturesque valley only one mile from a lovely beach and less than seven miles from The Eden Project. This family-run park is friendly, comfortable and exquisitely maintained.

Problem: The site near St Austell comprises of holiday apartments and static vans and is open to touring vans and tents. On site is a restaurant and bar, pool, shop, laundry and clubhouse. These facilities generate quantities of cardboard and plastic waste. This waste takes up space in bins and skips and looks untidy.

Solution: A **Mil-tek** 102 Baler has been installed at Sun Valley. All the cardboard waste is now baled and is collected for recycling. The plastic is also baled in the same machine.

Benefits: The Sun Valley team are very pleased with the ease of operation and especially pleased with the fact that no more boxes need to be flat packed and stored for the recycler.

The re-cycling area is now much tidier and all the baled cardboard and plastic is neatly stored ready for the weekly free collection.

Quote: "I was impressed with the ease of install and the in depth training my team received regarding the working practice of the equipment."

"I would have no hesitation in recommending Mil-tek to other businesses."

Gary Farr General Manager Sun Valley

- ◆ Sun Valley pride themselves in achieving the David Bellamy Award for the standards set in preservation, conservation and all environmental issues and re-cycling confirms their commitment to this subject in many ways.
